For 16 TB video to go

This portable storage system for eight 3.5" SATA (SAS) HDDs does not limit creativity e. g. when producing video. The extremely robust enclosure is as well rugged as light. Made of aluminium it also has a cooling effect. Plus there are two strong fans. Even the wiring is compact. There are only the power line and two data cables, either eSATA or mini-SAS. The eSATA version (ST8-S2P) offers two fourfold port-multipliers.

Notice

1. The eSATA interface connection requires to be connected to an eSATA port with port multiplication functionality in order for all 8 drives to be seen by your computer system.
2. The default of ST8-S2P / ST8-U5 function is JBOD type of storage system. Therefore, each drive installed will be seen as separate volumes by your computer.
3. The ST8-S2P and ST8-U5 allow you to install up to 8 hard drives of different models and capacities. They are not required to simultaneously have all 8 hard drives installed in order for the system unit to operate. You may use one first and add more drives later accordingly to your preference.
4. Although ST8-U5 allows you to install either SAS or SATA drives, it is recommended to check whether the mini-SAS host adapter you're using is downward compatible with SATA drives. Also note that the throughput performance may vary if SAS and SATA drive are installed.
